The diagram consists of a large grid with a diagonal line running from the top-left corner to the bottom-right corner. A horizontal line is drawn across the grid, and a vertical line is drawn down the center. A table is positioned in the upper-left quadrant, overlapping the grid lines. The table has 6 rows and 3 columns. The first row is a header row, and the remaining 5 rows are data rows. The table is defined by the following grid lines: the top-left corner is at the intersection of the top horizontal line and the left vertical line; the top-right corner is at the intersection of the top horizontal line and the right vertical line; the bottom-left corner is at the intersection of the bottom horizontal line and the left vertical line; and the bottom-right corner is at the intersection of the bottom horizontal line and the right vertical line.
